Projects

ZeroLeaks

Mar 2025 – Present

Founder & Lead Developer — Open-Source AI Security Scanner

- Built an open-source AI security scanner that tests LLM systems for prompt injection and extraction vulnerabilities using multi-agent architecture and research-backed attack techniques
- Engineered vulnerability assessment pipelines, prompt extraction prevention modules, and IP protection features
- Selected for Y Combinator interview (Jun 2025)

System Prompts & Models of AI Tools

Mar 2025 – Present

Creator & Maintainer — Open-Source Research Repository

- Extracted and documented system prompts from 30+ AI platforms through security research, building the largest public repository of its kind with 30,000+ lines of annotated documentation
- Achieved 100k+ GitHub stars and 30k+ forks (as of Jan 2026), making it one of the most-starred open-source projects globally
- Widely referenced by security researchers and cited in academic literature for exposing prompt injection failure modes and driving industry improvements

Recognition & Awards

- Awarded \$6,000 by OpenAI for contributions to AI safety via the GPT-5 Bio Bounty program (Jan 2026)
- Featured in La Nueva Crónica and other national media for pioneering AI security research as a teenager

Skills

- Security & AI: LLM red-teaming, prompt injection analysis, multi-agent orchestration, automated vulnerability scanning, prompt engineering
- Development: Python, TypeScript, JavaScript, React, Next.js, Git, GitHub, Vercel, CI/CD
- Languages: Spanish (native), English (bilingual)

Education

Colegio Marista San José — León, Spain

Sept 2022 – Present

High School Diploma (expected Jun 2027). Focus: mathematics, computer science, and technology.
